

GAINS THIRTY POUNDS

MRS. WEBER TELLS HOW SHE WAS HELPED WHEN DOCTORS FAILED.

She Let Her Trouble Become Chronic Because She Hesitated to Consult Her Physician—Particulars of a Remarkable Case.

The natural reluctance which every woman feels to consult a physician regarding troubles peculiar to her sex caused Mrs. C. Weber, of No. 7083 South Front street, Columbus, Ohio, to let her illness run on until it became chronic, and even the excellent doctor whom she employed could give her no relief that was permanent. She gives the following details of an interesting case:

"I felt the trouble a long time before I went to our doctor, perhaps a year or more. When I did consult him he told me I had female trouble. I felt sharp pains through my stomach and could not walk across the room without suffering agonies which I cannot describe. My head ached so that it fairly thumped and at times it seemed that I would go crazy. My stomach became so weak that it would retain only the lightest food. Week after week I took the doctor's medicine, but I continued to feel worse and worse. On several occasions I was confined to my bed for a week at a time. My weight decreased to 102 pounds and I seemed a confirmed invalid."

"One day I read of a case similar to mine that had been cured by Dr. Williams' Pink Pills for Pale People and, although I did not have much confidence, I began taking the pills, having already discontinued my doctor's treatment. While I was taking the second box I began to feel a little better and the improvement continued until I was cured. In a few months I had recovered my health and strength and weighed 133 pounds. I owe everything to Dr. Williams' Pink Pills."

No discovery of modern times has proved such a blessing to women as Dr. Williams' Pink Pills for Pale People. Acting directly on the blood and nerves, invigorating the body, regulating the functions, they restore the strength and health in the exhausted patient when every effort of the physician proves unavailing. These pills are sold in boxes at 50 cents a box, or six boxes for \$2.50, and may be had from all druggists, or direct from Dr. Williams Medicine Co., Schenectady, N. Y.

Judge Parker on Red Hair.
Judge Alton Brooks Parker, the democratic candidate for president, was recently chatting with an Auburn-haired visitor on his veranda at Rosemount, New York. Naturally, the conversation turned to the subject of red hair, which is a characteristic of the Parker family.

"When I was your age," said the judge to his guest, "my hair was redder than yours—it was fiery red, in fact, and, in consequence, my fighting instincts were overdeveloped while I was in school. In the country district where I learned my 'three R's' it happened that I was the only red-haired youth. When I first attended school the boys had a good deal of fun shouting 'sorrel' and 'red top.' It never failed to rouse my fighting blood, and I lived a strenuous life."

"But you wouldn't have changed the color of your hair, would you?" asked the visitor, blandly.

"No, indeed," said the judge; "red hair is all right. My daughter has it, and my little grandson there is as red as he can be. They say it is a sign of high temper, but it is also a sign of numerous excellent qualities."

"We've had two red-haired presidents," said the visitor—"Jefferson and Jackson, and they were both democrats."

"That's true," said the judge, "and don't you think it's about time we had a third?"—Success.

Physical Culture in Japan.

Japan is the only nation of the world in which the whole people have learned practical cleanliness of body, perfect ventilation and cleanliness of the house. Europe and America have not yet found out that the national wealth consists of health, and that national supremacy depends entirely upon medical and hygienic righteousness. We know, but do not practice the evident truth that the tuberculosis problem entirely, and those of most other diseases partly, depend upon ventilation and household cleanliness. While we allow the anti-vaccination foolishness its criminal voice in England, France and America, Japan has compulsory vaccination, and no small-pox. The world belongs to the physically strong, and the governments which spend their incomes on anything and everything except the one thing most necessary will surely go down before the armies of those nations that are more careful of the laws of preventive medicine.—American Medicine.

BY PROXY.

What the Baby Needed.

"I suffered from nervousness and headache until one day about a year ago it suddenly occurred to me what a great coffee drinker I was and I thought may be this might have something to do with my trouble, so I shifted to tea for awhile but was not better, if anything worse."

"At that time I had a baby four months old that we had to feed on the bottle, until an old lady friend told me to try Postum Food Coffee. Three months ago I commenced using Postum, leaving off the tea and coffee, and not only have my headaches and nervous troubles entirely disappeared but since then I have been giving plenty of nurse for my baby and have a large, healthy child now."

"I have no desire to drink anything but Postum and know it has benefited my children, and I hope all who have children will try Postum and find out for themselves what a really wonderful food drink it is." Name given by Postum Co., Battle Creek, Mich.

Both tea and coffee contain quantities of a poisonous drug called Caffeine that directly affects the heart, kidneys, stomach and nerves. Postum is made from cereals only; scientifically blended to get the coffee flavor. Ten days trial of Postum in place of tea or coffee will show a health secret worth more than a gold mine. There's a reason.

Get the book, "The Road to Wellville," in each pkg.

BURIED ALIVE IN A TRINIDAD MINE

Colorado Mining Town the Scene of a Horrible Disaster.

AT LEAST SIXTY ARE DEAD

The Cause of the Accident Was an Accumulation of Gas Which Suddenly Exploded, Burying Men in the Debris.

Trinidad, Col., Oct. 29.—A terrible explosion occurred at mine No. 3 of the Rocky Mountain Fuel & Iron Co., at Teredo, 40 miles due west of Trinidad, at 1:30 Friday afternoon, and the number of dead is variously placed between thirty and sixty men. The number reported as having gone into the mine Friday morning was 17 miners and four company men. Many more miners are known to have gone into the mine, but the exact number of dead may never be known, as the mine is burning, and in all likelihood the bodies will be cremated. A large number of mine officials left here as soon as word of the accident was received. Company doctors were picked up all along the line, as well as all other available physicians. United States Government Stock Inspector F. J. Foreman was at the Teredo when the explosion occurred. He returned here Friday night, and gives the following account of the affair:

"I was standing not more than 300 yards from the mouth of the tunnel when the explosion occurred. The explosion was preceded by a low rumbling sound resembling an earthquake, which made the earth tremble and startled the whole camp."

"I looked toward the mine, and out of the mouth of the tunnel and two airshafts came a great volume of smoke and dust, which continued for nearly a minute. Out of the two airshafts, each of which are seven feet in diameter, timbers that were fully from two to three feet in diameter were shot into the air and broken into splinters. Rocks were thrown over the camp for a distance of a quarter of a mile. In fact, it rained rocks, broken timbers and all kinds of debris for fully a minute, and many people were injured by being struck with these missiles."

"Immediately after the explosion, which was for all the world like a volcanic eruption, caused the wildest excitement. Women, men and children rushed to the mouth of the tunnel, and women whose husbands were in the mine had to be brought away by miners to keep them from being killed by deadly fumes coming from the mouth of the tunnel."

Sixty Men in the Mine.
The mine in which the accident occurred works 80 men, and it is believed that at least 60 men were in the mine at the time.

News of the explosion brought assistance from the adjacent camps, and on Friday night hundreds of men were trying to get into the mine. Deadly fumes overcame the rescuers frequently, but their places were immediately taken by others ready to risk their lives. It is not thought possible that any one in the mine can escape death, if they are not all dead already."

It will be impossible to secure names of the dead and injured for some time. Nearly all the miners employed are Slavs. The mine was opened only a year ago, and extended 2,000 feet into the hill. The explosion is supposed to have been caused by dust. But one body has been recovered, that of T. Duran, a driver, who was just entering the tunnel when the explosion occurred. He was torn and burned almost beyond recognition."

All mines within a radius of 20 miles have been shut down, and the miners are on the way to assist in rescue of the bodies.

NEWSPAPER CHANGES HANDS

Charles H. May and Francis H. Sisson Purchase a Majority Interest in Peoria Herald-Transcript.

Peoria, Ill., Oct. 29.—Charles H. May and Francis H. Sisson, formerly owners of the Galesburg (Ill.) Mail, on Friday purchased a majority interest in the Peoria Herald-Transcript. During the past year Mr. May has been with the McClure Newspaper syndicate, and Mr. Sisson with the McClure Magazine. Mr. May will be general manager and Mr. Sisson editor-in-chief. F. G. Rennick, from whom the majority interest was purchased, will continue the management for the present.

Gen. Miles to Speak.

New York, Oct. 29.—It was said at democratic headquarters Friday that Gen. Nelson A. Miles would visit some of the western states next week in the interest of the democratic national ticket.

Well-Known Attorney Ill.

St. Louis, Oct. 29.—Attorney George W. Taussig is said to be critically ill at his country home in Kirkwood. He is suffering from an affection of his heart and has been almost continuously confined to his home since last May.

Celebrate Golden Wedding.

Beardstown, Ill., Oct. 29.—Mr. and Mrs. Henry Thelvig celebrated their golden wedding at their home in this city, Thursday. A dinner party was given, which was attended by their four children and 17 grandchildren.

Former St. Louisian Dead.

St. Louis, Oct. 29.—Samuel N. Kellogg, a merchant in St. Louis before the civil war, is dead at his home in Hartford, Conn., at the age of 83 years. Mr. Kellogg took an active part in the development of St. Louis during 20 years preceding the civil war.

Fire at Fort Wayne, Ind.

Fort Wayne, Ind., Oct. 29.—A building on Harrison street, occupied by Pottlitzer Bros., fruit dealers, was burned Thursday night. The loss will reach \$30,000; fully insured.

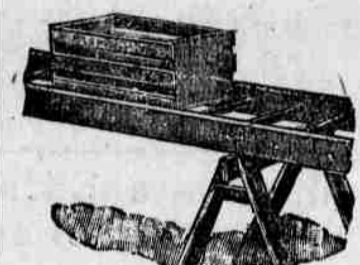

THE FARMING WORLD

MAKING UNLOADING EASY.

Skid of Simple Construction Which May Be Used to Slide Crates Over.

The device for rolling crates into the cellar is shown in the cut and is described by Mr. Vergon, in Rural New Yorker, as follows:

"Two roller skids, one 14 feet and one 16 feet long; the side-pieces may be made of any light timber which is not likely to spring, 1½ inch thick and five inches broad. The rollers may be made of any hard wood, turned 1½ inch in diameter, the ends shouldered down to three-fourths of an inch and the holes in side-pieces seven-eighths of an inch and eight inches apart. Bore the holes

SECTION OF SKID.

a little below the center line, which will make a flange of a couple of inches on the upper sides of the skids. Sink cross-pieces on the under side, with screws to hold the skids together. The width on the inside must be about one inch broader than the width of crates. Now halve the side pieces at one end of each skid about three inches back on reverse sides, as shown in the cut, so they will lap together and have a straight line. A good hook and staple on the outside makes the connection and you have a little railway 30 feet long if wanted. If full length is used, block up under the connection. These two skids cost me eight dollars many years ago. In most cases, one is all that would be needed, and their mode of use must be apparent. It takes but a few minutes to place them to reach any point where apples or potatoes are to be stored. For instance, our largest cellar is reached by two doors, and a turn at a right angle. In this case one of the skids is run through one of the cellar windows; a barrel is placed bottom up for the end of the skid to rest on; the window sill supports the center, and a couple of stakes driven in the ground with a cross-piece nailed on to support the skid at the proper height to lay the crates on from the wagon. It is astonishing how little time it takes to unload in this way. If the crates are emptied, roll them back on the wagon with a pile pole. We do not empty them, however, but stack them up."

WINTERING CANE FRUITS.

Protection Which Should Be Given Them During the Severe Cold Weather.

If the farmer has hardy varieties of raspberries and blackberries or lives where the winters are mild, his work is simple. If he has not already done it, go through the patch, cutting out all dead wood and weak canes, "stub back" the over-thrifty ones, burn the brush, and his patch is ready for the winter.

However, if he lives in northern latitudes or has tender varieties, his bushes must have a protective covering of some sort, says Mark Haverhill, in Orange Judd Farmer. Just before the ground freezes, the old wood having been cut out, go through the patch with a potato or other heavy tined fork, and loosen the ground around the roots of each hill, carefully bend the bushes over till they lie on the ground, weigh down and cover with earth. Care should be taken not to break any of the canes in laying them down.

Some people bend the bushes over, cover the ends with dirt to hold them and then cover all with straw or cornstalks from which all grain has been removed. The great objection to straw is that the mice nest in the straw and during the winter eat the green bark from the canes, killing them. Not so much trouble has been experienced with cornstalks, but probably earth is the best for it is always handy.

As soon as spring comes and the frost is out of the ground the covering should be removed and the bushes straightened up.

THE SETTING OF TREES.

Quick and Easy Way of Placing Them in Line with Each Other.

The stakes being set in the board is placed with the notch holding a stake. The pins are pushed through the end holes into the ground and then the board is lifted from them and laid one side till the hole is dug. The board is then replaced on the pins, the tree is set in the hole with its trunk in the notch and is in line.—A. I. Edson, in Farm and Home.

Horticultural Brevities.

Root rot rots out the center of the tree. Cedar rust will not kill fruit unless it kills all the leaves. It affects the leaves, not the wood.

Bitter rot is found as far north as Vermont, but has not been discovered in Nebraska.

Sometimes a peach tree will thrive in a spot where root rot killed the apple tree.

A codling moth is your worst enemy.

The finest orchard I ever saw was diked both ways.—Prof. Hegcock, department of agriculture.

Root gall is fatal to peach and several other trees and to grapes. Apple trees may live, but do not plant a tree that has root gall. A tree affected with crown gall is a doomed tree.

A NEW AFFLICTION.

TIMELY WARNING FOR AUTOMOBILE ENTHUSIASTS.

Legs of One Young Man Have Become Almost Useless from Continual Riding and He Finds Walking a Torture.

Here is a "horrible example" to the infatuated persistent automobilists; to those who are so devoted, so habituated that they jump into an automobile if they have to cross a street.

Here is an awful warning that if they do not walk more soon they will not be able to walk at all. Their legs will dwindle. They will retrovert. They will become automobile cripples, the victims of their mania for driving the devil wagons.

In a gymnasium at Hartford, Conn., the other day a rich young man, with fine muscular arms and body, while he painfully exercised his legs, said pathetically:

"My legs are wabby. I have been riding in my automobile all the time for three or four years. I have the habit, I have been either in the automobile or asleep all these years. Now my wife is not overfond of autoing and the other evening she said she would like to take a walk."

"It was a new idea. I had not taken a walk for so long it brought back the days of my courtship. I grew sentimental and I told her I would be delighted."

"We started. The great full moon shining and for a short time I was living over the old days and she seemed exceedingly happy."

"But we had not walked half a mile before I wished we were home. I did not want to flunk, so I kept on, but my legs hurt me awfully. The muscles stung me as if they had been lashed, my knee joints kept dipping and bending involuntarily. I tried to be gay and buoyant, but I made a dismal failure for all the time I realized I had gone back to a point where walking was practically impossible."

"The next morning I got a bottle of alcohol liniment and rubbed my aching legs, as I have not done since. I played football. Then I got out my auto, rode to the gymnasium and paid my fee for a year."

"And here I am making the effort of my life to get my legs strong enough to carry me when I need to use them."

The physical instructor at the gymnasium says it will be the work of a year or two before the auto legs begin to return to their normal condition.

At best, he says, they never will be as good as new. The principal defect developed is a lack of elasticity in the muscles, which seem to have become brittle from disuse.

DEATH RATE IS LOWER.

Bulletin of the Census Bureau Shows Consumption and Diphtheria Find Fewer Victims.

A bulletin recently issued by the census office, entitled "A Discussion of the Vital Statistics of the Twelfth Census," says that a diminution of the death rates for each class of people for the ages below 45 years is pointed out as noteworthy. The statistics indicate that the decrease was due largely to a lessening of the mortality from consumption, diphtheria and diseases of children, the lower death rates from these causes being considerably more than sufficient to offset the increased mortality from pneumonia, cancer, heart disease, apoplexy and diseases of old age. The greatest diminution is in the mortality from consumption, which, in the registration area, was 187 per 100,000 of population in 1900, while in 1890 it was 245.

The bulletin declares that no southern or western state except Michigan has any complete system of registering births or deaths.

MAINE ANIMAL CEMETERY.

Cats, Dogs and Hens of This Farmer Receive Decent Burial on Their Death.

About a mile south of Manchester Forks, Me., and near Quaker Hill farm, under a spreading oak, is an animal cemetery arranged with great care and looked after with solicitude. The idea was that of Miss Alfretha C. Burnham, daughter of the owner of Oak Hill farm.

The whole Burnham family have a great liking for pets. Besides Mr. Burnham and his wife there are three children—Alfretha, Clarence R., and Scott E. Burnham. All the children make much of the animals and seem to enter into their lives.

At the entrance to the cemetery is a large arch, across the top of which is painted: "Oak Tree Cemetery." The slabs are in regular order of two or three in a row, and the little plots are terraced and adorned with flowers.

CUPID STOPS FOOTBALL.

Girls of Woodbury, N. J., Opposed to Game, Declare Young Men Must Renounce One or Other.

Cupid has broken into the ranks of the Woodbury (N. J.) football team, and promises to disrupt the organization. After two months of hard work on the part of Manager Holsten in getting a sturdy lot of players together, he finds his team pitted against a combination of young women, who have risen in rebellion against the "brutal sport." Several of the strongest players have the choice of renouncing the game or their best girls. The young men have endeavored to come to terms with the girls by dealing out chocolates in profusion, but it won't work. Three of the players are said to be engaged to be married, and the girls declare the engagements are at an end if their fiancés get into another game.

LOCAL COLOR TOO STRONG

Sunday School Girl Works Local Hotel Into the Story of Bethlehem.

Seneca, Nemah county, Kan., is a thriving town of almost 3,000. Travelers thereto, says the Philadelphia Press, put up at the Gilford house, which is a real brick hotel and is regarded by the permanent population as the latest thing in the hotel line in the northeastern part of the state. To the children of the town it is known as "The Hotel."

So it was that when a faithful Sunday-school teacher endeavored to fix on the minds of her small pupils the story of the birth of Christ she described how Mary and Joseph had come into Bethlehem on the eve of the first Christmas and found the inn full of guests. To make it realistic she used the smile of the town of Seneca and explained how it was just as though the weary travelers had come in from the surrounding country at evening.

Too well she drew the picture, for one young miss was so impressed with the local color that when the Christmas festival came and the superintendent of the school asked for the tale of Bethlehem this young lady started out in this fashion:

"Mary and Joseph came to Bethlehem, but the Gilford house was full."

"She got no farther, however, for the walls of the church rang with the laughter of the audience, which realized that here was local color with a vengeance."

Cured Her Rheumatism.

Deep Valley, Pa., Oct. 31 (Special).—There is deep interest in Green county over the cure of the little daughter of I. N. Whippley of Rheumatism. She was a great sufferer for five or six years and nothing seemed to do her any good till she tried Doid's Kidney Pills. She began to improve almost at once and now she is cured and can run and play as other children do. Mr. Whippley says:

"I am very thankful for what Doid's Kidney Pills have done for my daughter; they saved her from being a cripple perhaps for life."

Rheumatism is one of the results of diseased kidneys. Rheumatism is caused by Uric Acid in the blood. If the kidneys are right there can be no Uric Acid in the blood, and consequently no Rheumatism. Doid's Kidney Pills make the kidneys right.

Why It Hurt.

"Don't feel so put up about it, Mr. Skemer," said Miss Roxley, after rejecting him. "I'm not the first girl you loved, nor, I venture to say, am I likely to be the last."

"No," he sighed, disconsolately, "but you're the richest."—Philadelphia Ledger.

Tenth Season of the California Limited.

Ten years ago this fall the Santa Fe started its California Limited train on the initial run across the continent. Many improvements have been made in that busy decade. Today's engines and coaches are much heavier than those of 1894. Millions of dollars have been spent on the track alone—some of it for oil-sprinklers, which keep the dust and oil-burning (smokeless) engines. The time is faster, too.

Daily service of the California Limited will be resumed Sunday, November 13, for the tenth season. The present semi-weekly schedule. This is now an all-the-year-round train, between Chicago, Los Angeles and San Francisco, running through Southernland of enchantment. The time, Chicago to Los Angeles, is about 68 hours, which is fast for the 2,325 miles traversed, considering that several mountain ranges are crossed.

The Proper Name.

The Daughter—No, mother, dear, I could not marry Mr. Smith; he squints. The Mother—My dear girl, a man who has \$100,000 a year may be affected with a slight optical infirmity—but a squint, never.—London Tatler.

Do not believe Piso's Cure for Consumption has an equal for coughs and colds. F. Boyer, Trinity Springs, Ind., Feb. 15, 1900.

Man cannot lift himself by his bootstraps, but many a man has pulled himself down with a corkscrew.

The letters of Miss Merkle, whose picture is printed above, and Miss Claussen, prove beyond question that thousands of cases of inflammation of the ovaries and womb are annually cured by the use of Lydia E. Pinkham's Vegetable Compound.

"DEAR MRS. PINKHAM:—Gradual loss of strength and nerve force told me something was radically wrong with me. I had severe shooting pains through the pelvic organs, cramps and extreme irritation compelled me to seek medical advice. The doctor said that I had ovarian trouble and ulceration, and advised an operation. I strongly objected to this and decided to try Lydia E. Pinkham's Vegetable Compound. I soon found that my judgment was correct, and that all the good things said about this medicine were true, and day by day I felt less pain and increased appetite. The ulceration soon healed, and the other complications disappeared and in eleven weeks I was once more strong and vigorous and perfectly well."

"My heartfelt thanks are sent to you for the great good you have done me."—Sincerely yours, Miss MARGARET MERKLEY, 275 Third St., Milwaukee, Wis.

Miss Claussen Saved from a Surgical Operation.

"DEAR MRS. PINKHAM:—It seems to me that all the endorsements that I have read of the value of Lydia E. Pinkham's Compound do not express one-half of the virtue the great medicine really possesses. I know that it saved my life and I want to give the credit where it belongs. I suffered with ovarian trouble for five years, had three operations and spent hundreds of dollars on doctors and medicines but this did not cure me after all."

"However, what doctors and medicines failed to do, Lydia E. Pinkham's Vegetable Compound did. Twenty bottles restored me to perfect health and I feel sure that had I known of its value before, and let the doctors alone, I would have been spared all the pain and expense that fruitless operations cost me. If the women who are suffering, and the doctors do not help them, will try Lydia E. Pinkham's Vegetable Compound, they will not be disappointed with the results."

Miss CLARA M. CLAUSSEN, 1307 Penn St., Kansas City, Mo.
